AS-NEEDED EMERGENCY FLOOD CONTROL AND ROAD MAINTENANCE FACILITIES REPAIR PROGRAM LA CRESCENTA AREA 30-INCH CORRUGATED METAL PIPE REPAIR PROJECT

On November 16, 2011, the Board approved an as-needed, on-call emergency contract with Mike Prlich and Sons, Inc. We are in the fourth year of the contract term, which was one year with four 1-year renewal options and up to six month-to-month extensions. Attached is a summary of the projects completed to date under this contract. As part of the approval, the Board instructed Public Works to report repairs carried out under this contract.

This is to notify you that we will be engaging Mike Prlich and Sons, Inc., to repair a failed 30-inch corrugated metal pipe road drain in the unincorporated La Crescenta area. After the recent rain storm in July 2015, the failed 30-inch corrugated metal pipe drain caused a small sinkhole in the front yard of 2741 Stevens Street. This road drain is crucial to handle flows from El Caminito, Stevens, and Alabama Streets. The scope of the emergency repair work includes cleaning and relining the drain and upgrading the existing catch basins. The pipe repair will start on October 7, 2015, and is expected to be completed in six weeks. The project is located in the Fifth Supervisorial District, and construction is estimated to cost \$510,000. We have met with the residents of the two most affected properties and will distribute project flyers to the remaining 10 residences that are in the immediate project area.
